

TUSCANY HILLS LANDSCAPE & RECREATION CORPORATION

75 Summerhill Drive, Lake Elsinore, CA 92532 • (909) 245-9102 • Fax (909) 245-1843

To whom it is a value:

As past President of the Tuscany Hills Landscape & Recreation Corporation (THRLC), Lake Elsinore, California, I was instrumental in executing the contractual relationship between THRLC and Soil Technology.

The contract was written to be performed in two phases. The first phase (Phase 1) consisted of 32 fertigation units, installation was to begin in January 2010 and be completed by mid April 2010. The second phase (Phase 2) consisted of 30 fertigation units, to begin installation on or around August 31, 2010. Under the supervision of Blaine Vice, Project Manager; along with Lowell DeLong, installation of Phase 1 went exceptionally well and was completed 3 weeks ahead of schedule. After 60 days of the units being installed the soil and tissue lab testing indicated that everything that we had planned to accomplish with plant health and soil restoration was rapidly moving in the right direction. With the water savings that we had already realized, the THRLC was able to move the Phase 2 installation up from August to May 1, 2010.

The soil reports and fertility program provided the THRLC board of directors with a level of confidences so as to award Soil Technology a contract for managing all 62 fertigation systems effective November 1, 2010 and expiring on April 30, 2011. The 6 month contract was executed as planned and the landscape material is healthier than it has been in a long time. Because of the progress Soil Technology has made and the system management that they provide, the THRLC board of directors has decided to renew the existing contract for an entire year, effective May 1, 2011.

The Tuscany Hill's board believes in the science based approach to landscape fertility management and recommends it to any homeowners association, city, municipality, or any entity in need of sustainable fertility management.
